

BLAZE® TREATED

Motor Valve Trim Kits

Leading Edge Lift Technology for the Life of the Well

BLAZE enhances the life span and productivity of oilfield equipment subjected to mechanical wear, corrosion and abrasion.

BLAZE trim kits are replacements for carbide or standard trim for motor valves. Trim Kits are used in numerous applications, such as plunger lift control, dump valve service, flow control and other aspects of flow-back and natural gas production.

Our BLAZE treated ball, stem and seat provide enhanced durability in the toughest operating conditions.
