

VENTED PIN PLUNGER

Game Changer

SPECIALTY ROD PUMPS

US Patent No. 9,970,271

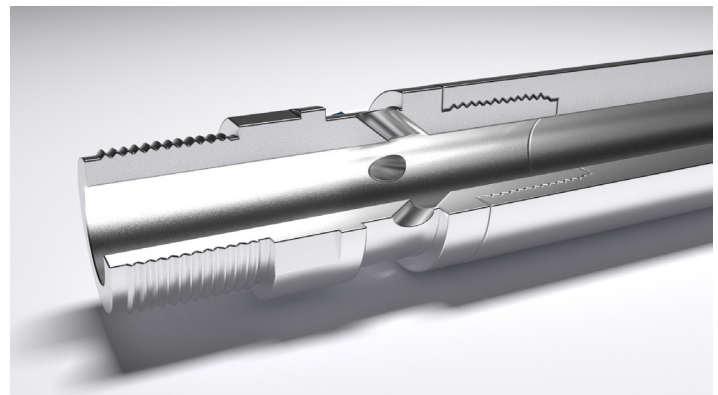

Maximize Production in All Operating Environments

Extend the lift of your rod pumps by protecting the plunger and barrel from damaging solids

Designed to clear away solids from the leading edge of the plunger by introducing fluid just above the upper end of the spray. Solids that would normally collect above a conventional plunger are now washed away on both up and down strokes.

Since 2014, the **Game Changer** Vented Pin Plunger has proven effective in mitigating the effects of sand and iron sulfide on rod pumps in every major US basin.

- Reduced pump repair costs
- Less frequent workovers due to lost efficiency
- 70%+ plunger failure improvement over standard pin plunger
- 75%+ barrel failure improvement over standard pin plunger

SIZE OPTIONS	
1.25 (in)	2-5 (ft)
1.50 (in)	2-5 (ft)
1.75 (in)	2-5 (ft)
2.00 (in)	2-5 (ft)
2.25 (in)	2-5 (ft)
